

**MAPI Research Trust**, whose objective is to promote and facilitate research in the field of Quality of Life related to health, is recruiting:

**Pharmaco-Epidemiology Project Leader**  
***Bilingual***

**Ref: 1-CPPE041209**

**Position description:**

Under the supervision of the center director, you will participate in literature review projects in different domains (pharmaco-epidemiology, epidemiology, quality of life and health, etc.) and development projects.

You will be responsible for:

- Participation in writing marketing proposals, and terms of reference;
- Contact with pharmaceutical industry clients, and research organisation;
- Documentary research in internal databases, external biomedical databases (Medline, Embase etc.) and on the internet
- Selection, review, analysis and synthesis of scientific publications ;
- Drafting synthesis reports ;
- Updating scientific databases.

**Candidate profile:**

5+ years of post-secondary education required, in a Life Sciences related field with complementary training in pharmaco-epidemiology:

- Bilingual written and spoken French/English
- Strong capacity for analysis and synthesis
- Mastery of online research as well as research performed on biomedical databases
- Expertise in Office software

You have experience in similar positions, experience in the fields of epidemiological studies or pharmaco-epidemiology would be a plus. You are motivated, organised, autonomous, and diligent.

Full time position to be filled starting from January 2010.

Based in Lyon 3.
